

**25th Annual
International Space Development Conference
Sheraton Gateway Hotel, Los Angeles, California
May 4-7, 2006**

Sponsor and Exhibitor Prospectus

The Public Space Event of the Year

For the first time in the history of space advocacy, the two largest space-interest groups in the nation will join together to produce the International Space Development Conference, ISDC 2006.

National Space Society and The Planetary Society invite you to join the excitement in Los Angeles May 4-7 for what promises to be the biggest and best citizens' space conference of all time.

This conference marks the 25th anniversary of ISDC. Leaders from all segments of the space community will be on the program to share their inspiration for the future of space exploration and development.

Key Leaders

ISDC will bring together a diverse range of space leaders, from government to private enterprise, from scientist to artist.

We are particularly pleased to welcome strong participation from NASA, led by Shana Dale, NASA's Deputy Administrator; and including Charles Elachi, Director of the Jet Propulsion Laboratory; Brian Chase, Assistant Administrator for Legislative Affairs; Angela Diaz, Chief Education Officer; John Connolly, Lunar lander preproject manager; and Neil Woodward, Deputy Director, Constellation Systems.

We are also pleased to welcome Rick Homans, Secretary of Economic Development for the State of New Mexico.

Sponsorship Opportunities

ISDC 2005 was sponsored by NASA as well as leaders of the American space industry, visionary companies who recognized the value of the exposure, audience and network offered by ISDC.

For ISDC 2006, a wide variety of sponsorship levels are available, so every company can find a package that suits its goals and budget. We invite you to demonstrate your support and attention for space exploration and its benefits by joining in sponsorship of ISDC 2006.

Exhibitor Opportunities

ISDC 2006 provides an excellent opportunity for exhibitors. More than 1,000 attendees are expected, as well as national and local media coverage.

A variety of exhibitor options are available, ranging from large, full-scale exhibition spaces to areas suitable for smaller companies and businesses.

Exploring New Worlds

The theme statement for ISDC 2006 is Exploring New Worlds. Our purpose is to engage the public, industry and decision-makers in an open discussion of why we pursue space exploration and development.

Return on Sponsorship Investment: Media and Publicity

Sponsors will receive wide exposure across a variety of media. As in 2005, we expect leading national, industry, international and local media sources to attend the conference. 2005 had coverage from national NBC Nightly News, the Discovery Channel, the BBC, the Economist, Wired Magazine, Popular Science, the Washington Post, the New York Times, Bloomberg, Business 2.0, National Public Radio, and Space News.

A print advertising campaign in Space News will bring recognition in the aerospace community. Prominent notice on the popular conference website brings additional exposure. A series of articles and advertising on Space.com, SpaceNews.com and other online sources will be ongoing. Finally, blast emails to members and press releases will spread the word.

Los Angeles, the major media hub and entertainment capitol of the planet, is a leveraged location for raising the profile of space and participating companies. Scientists, engineers, business and government leaders, pro-space activists and a sprinkling of media stars will inspire and inform, and ultimately broaden the constituency for space-interest goals.

Return on Sponsorship Investment: Exposure and Networking

With strong participation from government entities and NASA, ISDC offers an important opportunity to build corporate profile before key decision-makers in the civil and commercial space sectors. Top officials from NASA are confirmed as speakers and attendees to share the agency's goals and plans.

The opening day's Space Venturing Forum and later business tracks offer the opportunity to network with leaders of commercial space, from satellite and launch systems, to communications and broadcast, to emerging information leaders like Google Earth.

Return on Sponsorship Investment: Citizen Education and Action

Finally, ISDC offers the potential to share key messages with the citizens who provide a powerful voice in shaping government policy. Many of the people who attend ISDC are the most committed grassroots activists in the country. Sponsoring the conference shows that you show public engagement with space, and enables your firm or organization to share key messages with these important activists.

Attractions and Programming

ISDC 2005 set a new standard for citizen space conferences. With the added partnership of The Planetary Society, and participation from other key groups in the pro-space community, ISDC 2006 is poised to exceed the accomplishments of the 2005 event.

ISDC 2006 opens on May 4 with a day of programming sponsored by Space Tourism Society and Space Venturing Forum. The ORBIT Awards banquet that evening will mark the fifth anniversary of citizen space traveler Dennis Tito's trip to the International Space Station. Several attractive sponsorship packages are available for the dinner.

A wide variety of other space advocacy and educational organizations will join the two leading space-interest groups at ISDC 2006, including the California Space Authority, National Society of Black Engineers, Caltech Venture Forum, Space Studies Institute, X Prize Foundation, Moon Society, Students for the Exploration and Development of Space, Spaceward Foundation, and more.

A selection of top speakers is listed in the following pages.

Space Tourism ORBIT Awards Dinner

On Thursday, May 4, ISDC welcomes the Space Tourism Orbit Awards, produced by the Space Tourism Society with the National Space Society, featuring a special award by the first space tourist, Dennis Tito.

The latest space tourist, Dr. Gregory Olsen, is confirmed for the awards dinner, which promises to be a star-studded evening mixing Hollywood and space-travel notables. National Space Society Chairman Hugh Downs will serve as honorary chair. A special reception will welcome the evening's honorees as well as the National Space Society's Board of Governors.

ISDC Education Event

In conjunction with the Traveling Space Museum, the established LA aerospace education group, ISDC will also organize a special educational event with a local aerospace magnet school. In addition, selected students will be invited to the conference.

Co-produced by National Space Society and The Planetary Society

The Planetary Society and National Space Society make up the nation's largest block of advocates for space exploration and development, representing more than 120,000 supportive citizens.

Both organizations have a proven record of promoting space to the general public, and communicating citizen support to top decision-makers in government, industry and the media. Learn more about The Planetary Society at www.planetary.org and National Space Society at www.nss.org.
